

Purpose

The main idea is to consolidate locations of movies/ tv shows on streaming services

Gabe Darnell

If a show is on more than one streaming service, let the user choose where to stream it.

Gabe Darnell

Offer a personalized collection of the users favorite shows on a home page

Gabe Darnell

Offer the user reminders of deals or other, cheaper alternatives to watch the show in question

Gabe Darnell

Distribution

Major distribution through application stores

Gabe Darnell

Global release Q3 of 2030

Gabe Darnell

Talk to partners at Apple, Samsung, and Microsoft for access to their development tools.

Gabe Darnell

Offer a free trial period close to launch where users can interact with the application

Gabe Darnell

User Interaction

Allow the user to save specific shows to a “wall” where they can pick a place to watch the show provided it is still on it's home streaming service or the user owns it.

Gabe Darnell

Users can interact with one another; ratings can be assigned to certain movies or shows and updated.

Gabe Darnell

The application has the option for notifications to remind the user of leaving/arriving media

Gabe Darnell

The user will be able to link their streaming apps to the main application in order to monitor and manage subscriptions and favorites.

Gabe Darnell

Design Details

Main hub with three sub menus indicating current subscriptions to streaming services, favorited media, and current arrivals

Gabe Darnell

Current Subscription menu will include all subscriptions tied to the user. Will require signing into the streaming app in question

Gabe Darnell

Favorited Media: will be a “wall” that can be added and removed from. Will display the users’ favorite media and the current location of said media

Gabe Darnell

Current Arrivals: This menu will display media the user may be interested in based off of their favorite media as well as what media is currently streaming from the users favorited bar.

Gabe Darnell

Menus may become cluttered and un-organized

Gabe Darnell

Possible legal issues concerning managing subscriptions from an outside application

Gabe Darnell

Signing into an outside application may cause the main app to crash
